No 134 South 4th St (Room 3)
Philada. June 23. 1885.

Professor James C. Booth.

Very dear Sir,

Some of my influential friends are urging me to apply for a mint position. I ask you as an old friend to assist me in the matter. I would have you to certify that I was formerly associated with you in your Chemical Laboratory for analysis and instruction; that I have had the advantages of instruction under Professors Woehler and Bunsen of the Universities of Goettingen and Heidelberg; that more recently I was engaged in mining operations, and I am familiar with assaying in its various branches, etc. Please make the letter as strong as possible consistent

with truth. I want a position in the Assayers departments. I will call on you in the course of two or three days in relation to it.

Yours very truly

Benj. Stuckle
